SUMMARY FOR THE CHIEF MINISTER

Subject APPROVAL OF DRAFT POLICY FOR OUTSOURCING OF LOW-PERFORMING SCHOOLS IN KHYBER PAKHTUNKHWA

The Provincial Cabinet, in its 39th meeting held on 02.10.2025, approved the outsourcing of low-performing Government schools through the Elementary & Secondary Education Foundation (ESEF) as a strategic reform initiative to improve access, enrolment, quality of education and governance in the public education sector. The Cabinet further approved the phased implementation of the programme together with the requisite financial framework and directed the Finance Department to make annual budgetary allocations for its operationalization.

2. Pursuant to the aforesaid decision, the Department initiated implementation of the programme and, in the first phase, 500 low-performing Government schools (222 in the Winter Zone and 278 in the Summer Zone) have been outsourced through a transparent and competitive process. The outsourced schools in the Winter Zone have commenced operations, while the schools in the Summer Zone shall commence academic activities from September, 2026 in accordance with the academic calendar. The programme is being implemented through selected education partners under the supervision of the Elementary & Secondary Education Foundation (ESEF).

3. During implementation of the first phase, a number of issues have emerged relating to governance arrangements, institutional roles and responsibilities, performance management, monitoring and evaluation, community participation, Parent Teacher Councils, infrastructure obligations, treatment of Out-of-School Children, contract administration, financial governance, dispute resolution and other implementation matters. While these issues have been addressed administratively on a case-by-case basis, the absence of a comprehensive policy framework may lead to inconsistent implementation and varying interpretations during future phases of the programme.

4. It has, therefore, become necessary to establish a comprehensive policy framework to provide uniform principles, clearly define institutional responsibilities, strengthen accountability mechanisms and facilitate consistent implementation of the outsourcing programme across the Province.

5. Accordingly, a comprehensive Draft Policy for Outsourcing of Low-Performing Government Schools has been prepared to institutionalize the programme, provide a coherent legal, administrative and governance framework, ensure clarity in the roles and responsibilities of all stakeholders, and facilitate transparent, accountable and sustainable implementation of the programme.

6. The Hon'ble Chief Minister may kindly approve placement of the case before the Provincial Cabinet for consideration and approval of the Draft Policy.
